

Supplementary Figures

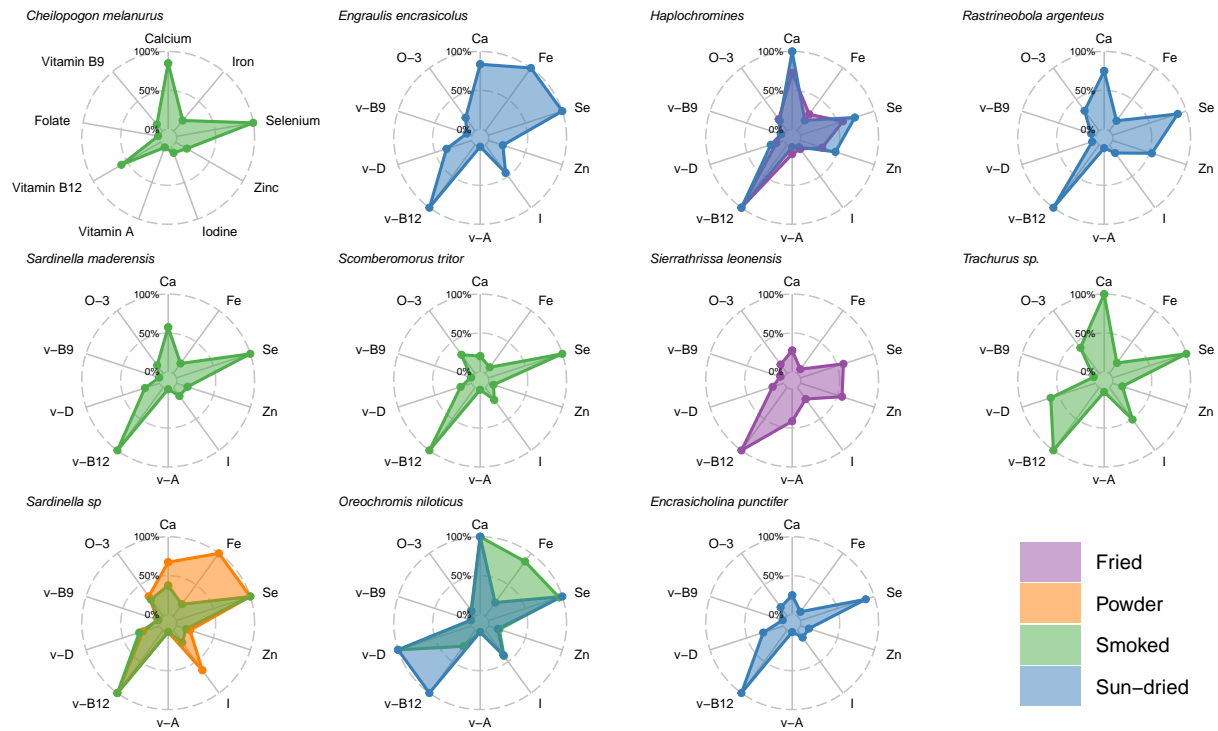

Fig. S1. Nutrient content of processed fish species. Radars show contribution of 12.75g portion to recommend intakes of each nutrient, for each sampled species. Plots coloured by processing type.

Fig. S2. Portion size of processed fish species required to reach recommended nutrient intakes. Lines show the contribution to RNI (children 0.5 - 5 years old) across range in portion sizes, for each nutrient and by processing type. 15% is the RNI for a food to qualify as a source of nutrients.

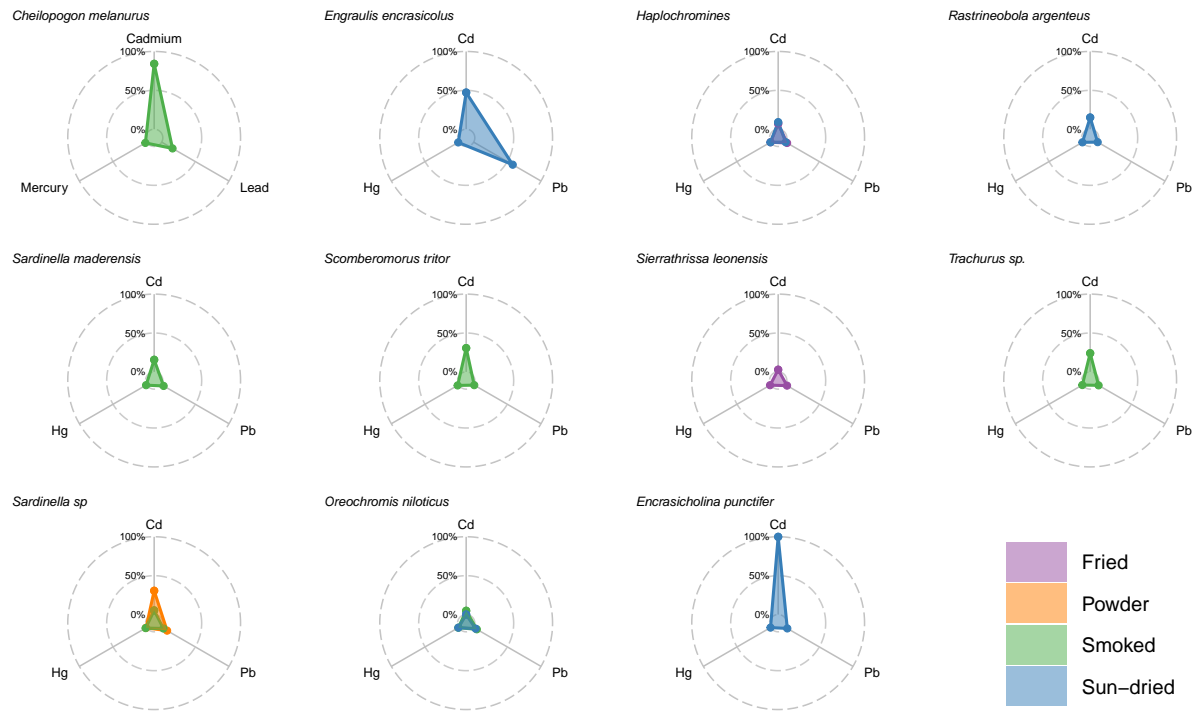

Fig. S3. Contaminant content of processed fish species.
